TWO SIDES TO QUESTION

COAL COMMISSION IN SESSION-INTERESTING TESTIMONY.

LAWYERS ARE SUGGESTED

Miners Want Bank to Bank Day, Compensation Law and Bi-Weekly Pay While Operators Think Two Former Would be Harmful.

The provincial coal commission to investigate the coal mining industry with a view to the enactment of new laws for the regulation of the industry, reached Frank Monday morning and is holding its inquiry for Frank, Lillie, Bellevue and Lundbreck here. The sessions are being held in School Hall. The members of the commission are Chief Justice Arthur L. Sifton, Louis Stockett, manager of the Pacific Coal company at Bankhead and William Hasom, president of the Coleman mine's union. E. Trowbridge is secretary of the commission and Provincial Librarian W. A. Buchanan is also in attendance. The sessions commenced Tuesday and some very interesting testimony has been taken. It indicates that there are distinct two sides to the question, the miners all advocating strongly the enactment of an eight hour bank to bank day, a workmen's compensation act and the bi-weekly pay day law while the operators, though offering no strenuous opposition to the bi-weekly pay day, express the conviction that the two former would be harmful. The evidence so far as Frank is concerned, was taken Tuesday. Bellevue was heard Wednesday. Lillie Thursday and Lundbreck Friday. It is the expectation at this time that the commission will sit at Coleman Monday.

James Nicol, president of the Frank miners union was the first witness examined. In reply to the question as to what he thought was required in the way of legislation to better the condition of the men employed in and about coal mines, he stated that if the eight hour bank to bank day was made law, the compensation act and a bi-weekly pay day enacted, the miners would be content and satisfied. Asked to make further suggestions he said that the men find difficulty with the means provided for carrying explosives into the mine, that the tops frequently come off the cans and the powder is spilled back down the mainways. He thought a regulation should be made requiring operators to put timbers at the nearest working face. The witness referred to the manner in which the district mine inspector inspects the mine and said he does not do it thoroughly. He said that the men avail themselves of the provision of the law permits them to inspect the mine and that it takes two days to make a thorough inspection. Asked by Commissioner Hasom if he did not think there should be some provision made to protect the men from discrimination from the operators, the witness thought they should be legislation on that point. Asked by Mr. Stockett if he thought it would be equally well to have legislation to protect the operators from discrimination by the men, the witness said he did not see any reason for it.

James Turnbull, miner, reiterated the views of Mr. Nicol and in addition said he was opposed to boys under eighteen being permitted to work in a mine except in the gangways. He did not think a compensation act would operate as a discrimination against old men by causing operators to give preference to young men as he had worked many places where there was no compensation act and young men were given the preference over old men just the same.

David Stone, miner, held much the same views as the preceding witnesses. In referring to the statement made at Lundbreck by an operator, that a compensation act would increase the cost of coal, he said he had worked in the old country where a compensation act was in force and it

had produced no such result, that in fact it made absolutely no difference in the price of coal.

Three representatives of the Slavonic division of the coal miners gave testimony along similar lines.

General Manager S. M. Moore of the Canadian-American company, testified in the afternoon. Questioned concerning the coal shortage last winter, he stated that the coal shortage accounted for it chiefly. He said the Frank mine was closed down a great deal of the time for want of cars and he agreed to supply the commission with statistics relative to such stoppages.

Questioned concerning the proposition of storing coal, Mr. Moore said the Frank coal would stand storing, that is, it would not deteriorate to any appreciable extent under storage but that his company was not prepared to make provision for storing coal under the existing price, that is, in any event; if the railroad furnished the cars the company would not have any coal to store. He said the C.P.R. had proposed that the company store coal, fearing that there would likely be another coal shortage. He had replied that if he did so it would have to be at the expense of the railroad company as the margin of profit on coal at the present price is so small to warrant the company going to the expense. Mr. Moore said he thought there would be fuel families until the people took to buying their coal in advance or until dealers adopted the policy followed in many places of establishing coal warehouses and laying in winter stocks during summer seasons. The witness was in favor of incorporating the miner's unions in order to make them responsible. He said that under present arrangements, they were not responsible and cited a case wherein the Frank union in violation of its agreement, shut down the mine by stopping work to hold a meeting. The company was not to compensate the expense yet had no recourse as the union was not responsible. The witness was opposed to a compensation act unless it were made general, holding that a compensation act touching coal mining alone, would penalize that industry. If such an act were passed at all it should cover railroads and every other industry. As to the eight hour day from bank to bank, he said that would mean an average of about six hours at the face in the Frank mine. He expressed himself as satisfied with the present mining law.

At Wednesday's session Clement Stubbs, Arson Mosley and Reese Evans of the Bellevue mine testified. They complained that coal shortage and scarcity of timber had caused stoppages which had resulted in pay checks being low at times, as \$8.25 for a month. At other times checks had run as high as \$14.00. They advocated having the mine inspectors report posted conspicuously at the mine. Mr. Evans favored an apprenticeship for all persons employed at working faces and all favored an examination for such workmen. All thought every miner should be required to speak English to some extent and be able to understand it.

TO ENCOURAGE NEW INDUSTRY

BOARD OF TRADE FAVORS CEMENT COMPANIES PROPOSALS.

COMPANY WAS HEARD

Representative of Company Laid Proposition Before Board Monday Evening—Asked Tax Exemption, a Bonus and Big Bonus of Bond Sold.

At the regular meeting of the board of trade Monday evening, W. B. Reilly, secretary of the Rocky Mountain Cement company was present and laid the proposals of the company before the board and as it is usual in such cases he had very little difficulty in stampeding the board into recommending to the ratepayers of the village that they grant the company exemption from taxation.

Mr. Reilly, as spokesman for the company asked that the company be exempted from paying any but school taxes for ten years, that the main of the water company be extended to the works, that the village raise a bonus of \$5000 to be paid over when the company had expended \$10,000 and that the village guarantee the sale of \$30,000 worth of the bonds of the company.

Mr. Reilly spoke at length, pointing out the advantages that would accrue to the town by having the works located here, after which T. B. Martin moved that the board recommend to the ratepayer that he call a special ratepayers meeting to consider the proposals and that the board recommend the tax exemption asked.

A motion to amend by merely recommending a meeting to consider the proposal, was defeated and the original motion carried.

Nothing could be done with the bonus proposal as Frank, being only a village, has no power to deal with such a question. The extension of the water main, it was stated, would be done by the company which owns the water system with regard to the sale of bonds, the board appointed a committee to interview the engineers to determine what portion of the extension could be placed. The committee named is composed of J. H. Farmer, T. B. Martin, Alex Gorette, A. Manuel and R. Stevens. Thus far the committee has made very encouraging progress in selling the bonds.

As to the merits of the Rocky Mountain Cement company's proposal, the Frank Paper is unable to endorse the action of the board of trade although it is disposed to do everything in reason to encourage and facilitate the establishment of the proposed new industry here. It does not believe exemption from taxation is the best method of dealing with cases of the kind. With this paper it is not so much a question of the loss of revenue to the village as of principal. It believes that if we grant this exemption, we shall establish a precedent that will return to the village as a bonus for every thing that a new company comes along and proposes to establish in Frank and will demand exemption from taxation, we shall in decency be compelled to grant it and we shall be taxing ourselves to build streets and make other public improvements from which the companies will derive as much benefit as the rest of us yet will contribute nothing toward them.

The argument is made that this industry and any others that may come and be exempted, will add to the property of the village in which all jobs and that is undoubtedly the fact but it is just as indisputable the fact that this or any other company will come to Frank unless it expects to make money. If it does make money it can well afford to pay a just tax and has no more show of right to exemption than has the small business man who comes here and puts his all into a business or the working man who puts his little pile into a home.

THE FRANK PAPER believes it would be eminently proper to grant the cement company and every other company that establishes an industry here, exemption from taxation for five years, a sufficient time to enable them to get started and begin making money. Anything more in that direction cannot be honestly be asked. This paper does not believe any company that finds Frank an advantage one place to locate will stay away because it is not given the additional five years exemption. If it does stay away as a matter of reason, it is true that it can well be spared.

NOTICE

The Liquor License Ordinance Province of Alberta

Application has been made by Archibald Pettibone for the renewal of his license in respect of the Albert Hotel situated on lot 2, Block 2, Cowley, Alberta.

This application will be considered by the Board of License Commissioners at a meeting to be held at Pincher Creek, on Tuesday July 2nd, 1907, at 8 o'clock p. m.

Dated at Edmonton this 31st day of May 1907.

S. B. Woods,
Deputy Attorney General.

H. S. Clements, M. P. for West Kent, Ont., paid a brief visit to Frank Tuesday to inspect the Hines mine in which he is interested. Mr. Clements expressed himself to THE FRANK PAPER as being strongly interested with the possibilities of this district.

THURSDAY, JUNE 6, 1907.

Two Years Old.

The FRANK PAPER is two years old today. "Wonder if the judgment of our coteries is that we have kept up our lick. When the first number of the paper appeared it was singular to note with what unanimity other publications, in noticing our advent into the newspaper field, made use of the expression: "The new publication is a splendid newspaper production. It will undoubtedly achieve marked success, if it can keep up its lick."

As nearly as we can remember these are almost the exact words of an expression of the one sentiment that went the rounds of a large number of papers. Two years have come and gone since the appearance of THE FRANK PAPER called forth that peculiar reference. There has been never been a time when there has been any let up in the effort of the publisher to make just as good a newspaper as the first issue; and to what end? There has never been a week but at least a few new subscriptions came to the office unsolicited; the volume of advertising has never at any time decreased but has steadily increased until it is greater in this issue than in any previous one.

On the whole we feel we have kept up our lick measurably well. In entering upon the third year THE FRANK PAPER has no other promise to make than that it will endeavor to continue keeping up its lick. If it does that we feel it will deserve the fair measure of success it has enjoyed thus far.

EDITORIAL COMMENT.

The provincial coal commission which is to inquire into all conditions touching the coal mining industry, commenced its investigation at Lethbridge last week and comes to Frank this week. As the purpose of the commission is to get at the true ins and outs of all conditions surrounding the coal mining industry and to make a report to the government upon the strength of which the government can frame laws for the regulation of the industry which shall be absolutely fair and just to both the operators of coal mines and the men who work in and around them or as nearly so as it is humanly possible to get them, the commission, when it sits here and at Coleman, should be afforded every possible facility and assistance to enable the members to reach equitable conclusions. Inasmuch as it is certain the government is going to take a hand in the business of running coal mines to the extent of making regulations under which they must be operated, it is best on every account that those who give testimony before the commission be especially careful to give only such information as they know to be absolutely accurate and reliable. If that is done, if all prejudices are sunk and only the common good is sought, the laws that will result will not hurt any party to the coal mining business but will be immensely beneficial to all.

From Blairmore comes to THE FRANK PAPER a communication about baseball for the summer which contains, as we think, a valuable suggestion. The writer suggests that a league for The Pass be formed comprising the towns of Coleman, Blairmore, Frank, and Little and Bellevue.

The Columbia Bar

S. 114 Howard Street,

Opposite Columbia Theatre,

Conducted by

BOB JOHNSON

Formerly of Frank who will cordially welcome any of his old acquaintances from The Pass when visiting Spokane.

If they desire to come in. The suggestion further, is that each town organize a strictly local ball team and enter the league, that each town pay a league membership fee of say \$10, or any other sum considered proper and the funds thus raised be used for providing a championship trophy to be played for by the teams, that there be an equal number of games played in each place and the gate receipts be equally divided among the teams to help defray the expense of providing the outfit. The FRANK PAPER regards the suggestion as an admirable one and believes that if such a program were carried out it would afford a lot of the most interesting sport we could have. It is not too late to put the scheme into effect, why not call a meeting and endeavor to organize a league? As there seems no prospect of any other kind of sports for the summer, why not make the try and see what can be done?

Coleman is going to hold a celebration, the first in the history of the town, on Dominion Day. Inasmuch as Coleman has always been a most liberal patron of sports and celebrations in other towns of The Pass wherever they have been held since the town was organized, it is the hope of THE FRANK PAPER that the people of every part of the district will avail themselves of the opportunity to show their appreciation by turning out and assisting to make Coleman's effort the success of which the Coleman people are deserving.

SYNOPSIS OF CANADIAN NORTH-WEST HOMESTEAD REGULATIONS

Any, even, numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 1 and 26, not reserved, may be homesteaded by any person who is not a member of a family or any male over 16 years of age, to the extent of one-quarter section of the series, more or less.

Entry must be made personally at the local land office for the district in which the land is situated.

The homesteader is required to perform the conditions connected therewith, under one of the following plans:

(1) That he pay, within a reasonable time, the cultivation of the land in each year of the three years.

(2) If the father (or the mother, if the father is deceased) of the homesteader resides on a farm in the vicinity of the land entered for the homestead, the requirements as to residence may be satisfied by residence upon the said land.

(3) If the settler has his permanent residence upon a farming land owned by him, the validity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

The written entries in writing should be given to the Commissioners of Dominion Lands at Ottawa of intention to apply for patent.

W. W. Cox, Deputy of the Minister of the Interior.

CUT WORMS IN THE FIELDS AND GARDENS

Bearing in mind the enormous damage that was done by cutworms last spring, it will pay the farmer and garden owner to give a look to their crops as early as possible after they are sown and at any rate just as soon as the small plants begin to appear. The parent moths or millers were not very numerous last fall so that probably the cut worms will not be nearly so plentiful this spring as they were last, but from reports and from what has already been seen in the fields and gardens there is still risk of a good deal of damage from the depredations of these creatures this year.

These pests are very easily destroyed and the remedy consists in applying a mixture of bran and paris green to the surface of the ground in which the cutworms are hibernating. The creatures come out to the surface to feed at night and bran seems to be in great favor with them as a food, and when there is a judicious mixture of paris green along with it they usually are quite satisfied with one meal. The mixture should be in the proportion of one pound of paris green to 50 pounds of bran, although some authorities prescribe double the quantity of bran to the same amount of paris green. The bran should be mixed with sweetened water till it is crumbly, not sloppy and the paris green dusted on to it and thoroughly mixed. It may be applied with a piece of shingle or even the bare hand if only a small quantity is to be used. Many farmers found this treatment very effective last year and indeed it is now recognized as the standard remedy all over the country where ever cut worms become a pest.

To prevent disappointment in the cabbage patch every plant should be protected by a screen of paper twisted on the stalk just above the roots and loosely enfolding the leaves. This forms an effectual barrier to the cutworm, it is easily applied, and does not interfere with the growth of the cabbage.

"PEEK'S BAD BOY" COMING

The production at Blairmore, Alta., on June 6-7 of the famous play

phenomenally successful farce comedy, "Pek's Bad Boy" is the only one authorized by Ex-Governor George W. Peck of Wisconsin, author of the book of the same name, the appearance of which was the literary and laughable sensation of the day, and which suggested the Boston Brown and other inferior imitations with which the press and stage have been deluged. The one and only play bearing the seal of Governor Peck's permission and approval follows closely the lines of laughter laid down by him, and for twenty years has achieved a popularity and success fairly rivaling that of his work. Broadened in humor and artistic scope the present season by the introduction of additional incidents, climaxes, characters, features and convulsing complications, giving ample scope to the versatile talent of an uncommonly strong company of comedians, vocalists and specialty artists, it steadily retains a "standing room only" grip on popular favor and promises to retain that hold as long as people know how to laugh.

FOR SALE—Eight head of horses three set of double harness, one lumber wagon. Also a blacksmith shop with tools and everything complete. Must be sold before May 15th. Apply to W. Sanvidge, Co. eman.

Frank News in Brief

Buy your clothing of A. V. Lang.
The Fraser Pierrots concert company appears at School Hall to-night.
A Geyette, Frank, Alberta, dealer in furniture and wall paper.

Rescuee Peter McLaren is visiting his mill property west of Blairmore.
Mrs. W. Blair of Lillo is at Dr. Malcolmson's hospital to undergo an operation.

The Rev. T. B. Keelan arrived in Frank last week to take charge of the interests of the Baptist church in The Pass.

The poles for the government telephone line have been unloaded along the route to the east of Frank and are soon to be erected.

Fred Thompson, the tailor of The Pass, has moved into his new shop at Blairmore and will make Blairmore headquarters in future.

Fraser & Sinclair, the contractors have purchased Lot 4 in Block 24, at the north end of Dominion avenue and will build a carpenter shop and a residence on the property at once.

C. I. Parks, a resident of Blairmore, died Saturday morning at the Sanatorium where he was taking the baths. Death resulted from a complication of ailments of which he had long been a victim.

Carpenters are engaged this week enlarging the fire hall for the accommodation of the hook and ladder truck. The electrical alarm to connect the fire hall with the boiler house at the mine, has arrived and been installed.

Stephen Humble of Bellevue was badly injured Tuesday in an accident in the mine. He had fired a round of holes but went back too soon and a delayed shot exploded in his face. His face and both eyes were badly injured but Dr. Malcolmson has hopes of saving the eyes.

The trial of Wm. Peetak for assaulting Robert Evans with a pick some months ago, was held at Macleod Tuesday. The trial lasted about three quarters of an hour when Judge Harvey discharged the accused with the remark that had he been in the defendant's place he would have used a pick too.

Hon. W. H. Cushing, minister of public works arrived in Frank yesterday and has driven over the roads of the district with a view to directing that the remainder of the road work to be done this season be done where it is most needed. Mr. Cushing visited Coleman this morning and appeared before the board of trade. He is to appear before the Frank board this evening.

Bishop Legal and Father Lacombe visited The Pass district last week.

Next Sunday will be the last Sunday of the Rev. Francis, when he will preach his farewell sermon.

Isaac Dorensford had a horse killed by a train at the Sanatorium during the week.

A. V. Lang spent Tuesday at Macleod this week in attendance at the session of court.

Mrs. J. W. Ashdown returned Sunday from an extended visit to Ontario.

The recent wet weather caused a cave in the main gangway at the Highest mine. The damage is being repaired, the work being about completed.

J. M. Turnbull, of Trail one of the engineers for the mining department of the C. P. R., has been making an examination of the Highest company's mine the past week for the purpose of making a report on the property.

The Rev. J. B. Exanels is about to sever his connection with church work in The Pass and will leave shortly for Victoria. He is succeeded by the Rev. Frank Frizzle, formerly of New Brunswick who arrived last week.

Joseph Buxton, provincial boiler inspector, held an examination in Frank Tuesday of applicants from various Pass points for engineers certificates at which eight applicants wrote for papers. An oral examination was also held of applicants for provisional certificates.

L. A. Cutting died at Dr. Malcolmson's hospital Saturday morning at 11:30. Mr. Cutting underwent an operation at the coast about a year ago which did not prove successful and another operation became necessary. This was performed about two weeks ago but the patient's condition was such that there was little hope of recovery. The deceased was one of the old time residents of the Pincher Creek district and was a highly respected citizen. He was 42 years of age and unmarried. His relatives and many friends in other parts will be consoled to know he was comforted in his last illness by his oldest and best friends, a very large number of whom were in attendance at the funeral which was held at Blairmore Monday at 3 o'clock in the afternoon.

The Rev. Welsh, English Church minister officiating. Interment was at Blairmore cemetery. Peter Cutting, a brother, who is a member of the mounted police, stationed at Regina, reached Frank in time to be at his brother's bedside when the end came.
